

Scapa BB100

Vapour Barrier High Performance Adhesive

DESCRIPTION

Scapa BB100 is a thixotropic adhesive without solvents for adhering films. It uses a strong adhesive substance made from acrylic and is designed to be applied to different substrates to join vapour barriers in new constructions and in renovations.

APPLICATIONS

- For joining vapour barriers on all construction materials (wood, fibreboard, OSB panels, chipboard, plaster board, concrete, bricks, PE or PVC components).
- Suitable for polymer films, aluminium, Kraft paper, non woven.

PRODUCT BENEFITS

- Odourless
- Contains no harmful substances
- Reliably absorbs all structural movements
- Solvent free :Resistant to aging
- Quick and reliable application
- Extremely water-proof on different substrates
- Strong adhesion to different materials

TECHNICAL PROPERTIES

STANDARD PRESENTATIONS

Note:

*Packaging: 310ml cartridge
20 cartridges per box*

RECOMMENDATIONS

The cartridges should be stored sealed closed in their original packaging in a dry and cool place. A maximum use by date of strictly 24 months from the date of manufacture is recommended.

Surfaces to which the adhesive is to be applied must be clean, dry and free of all traces of dust, grease, oil or any other contaminating agent.
