

Scapa 7022

Polypropylene Adhesive Tape Reinforced with Woven Glass Fibre

DESCRIPTION

Scapa 7022 is an ultra resistant polypropylene adhesive tape reinforced with woven glass fibre reinforcement, very hard-wearing. Scapa 7022 is coated with a rubber adhesive that is pressure sensitive, with a total thickness of 110µm, and recommended for all sealing, packaging and palletisation applications.

APPLICATIONS

- Strengthened sealing of cartons
- Hard-wearing packaging
- Palletisation of boxes
- Suitable for all medium and heavy sized packaging at home, the office and in all industrial environments.
- Strapping for heavy items, making pallets safe and strengthening parcels

PRODUCT BENEFITS

- A great resistance to breaking lengthwise and crosswise
- Resistant to impacts during transportation

TECHNICAL PROPERTIES

Technical Property	Nominal Value	Unit	Test Method
Adhesion to Steel	6.6	N/cm	AFERA 5001
Elongation at Break	5	%	AFERA 5004
Tensile Strength	160	N/cm	AFERA 5004
Total Thickness	110	µm	AFERA 5006

STANDARD PRESENTATIONS

- Packaging: Individual, shrink wrap with 2 labels
- Roll Length: 50 metres
- Roll Width: 50mm

RECOMMENDATIONS

The rolls must be stored flat in their original packaging, protected from dust, light, damp and solvent fumes at a temperature between 15°C and 25°C inclusive. In these conditions the storage time in a temperate climate must not exceed 12 months.

Surfaces must be clean, dry and free from dust, grease, oil or any other contaminant.
