

R618

Silicone Protective Tape For Thermal Textile Decoration

DESCRIPTION

Scapa R618 is a 75µm clear polyester film, single coated with a high performance transparent silicone pressure sensitive adhesive system.

APPLICATIONS

- Can be used as an Application Tape.
- Heat transfer of flock film onto textile.
- Recommended for temporary masking and protective applications.

PRODUCT BENEFITS

- Temperature resistance up to 160°C short period.
- Heavy duty polyester film backing
- Clean removal without adhesive residue

TECHNICAL PROPERTIES

Technical Property	Nominal Value	Unit	Test Method
Total Thickness	100	µm	AFERA 5006
Peel Adhesion	7	N/25mm	AFERA 5001
Operating Temperature	160	°C	-

STANDARD PRESENTATIONS

- Roll Length: 1500 meters
- Roll Width: 1050 mm
- Core: 76 mm
- Colours: Transparent

RECOMMENDATIONS

The rolls should be stored flat on their cut edges in the original packaging. The product must be protected from dust, heat, moisture, direct sunlight and solvent fumes. Storage temperature between +10°C and +30°C. Under the conditions, the storage life of the tape in a temperature climate will be at least one year.

Surfaces should be clean, dry and free of dust, grease, oil or other contaminants. Adhesive performance should be carefully checked when used on substrates containing plasticisers.
