Industrial

Polyflex™ Plus UV

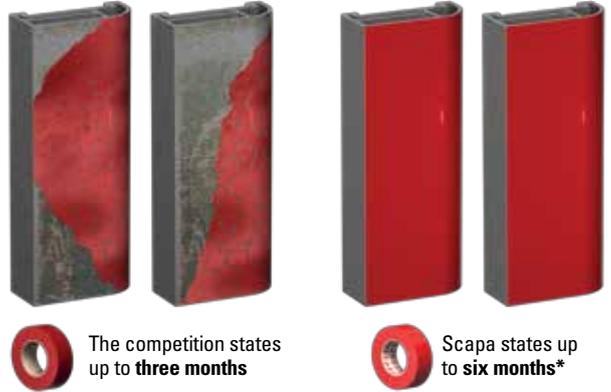

Scapa UVX10 is a 135 micron PE film coated with an acrylic adhesive system offering not only higher adhesion and improved tack but also clean removal, even after 6 months!*

UVX10 is ideal for a full range of specialist temporary masking and protection applications. It is highly recommended for use on a range of textured rough surfaces, particularly structurally coated aluminium profiles.

HOW LONG IS TEMPORARY?
IT DEPENDS ON WHO YOU ASK!

Polyflex™ Plus UV

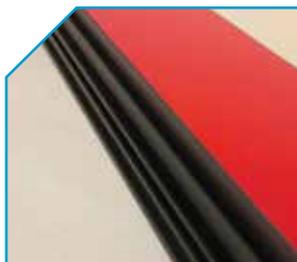

KEY BENEFITS

- Excellent tack for instant bonding and ultimate adhesion to a wide range of surfaces
- Removes cleanly after use, even after medium-term UV exposure
- Specifically designed removable acrylic adhesive for use on rough, embossed and structured surfaces
- Thick and conformable film allows easy positioning, yet superior protection, against mechanical damage
- Highly recommended for temporary masking and protection applications for both indoor and outdoor environments
- Versatile for both manual and automated application methods - no stretching!
- Designed to resist humidity, allowing good performance over a range of environmental conditions
- Protects high value items from mechanical damage, even when exposed to medium-term UV light
- Available in both red or white colour shades to enable easy detection and identification
- Easy to use and apply - can be torn by hand
